

1                   **ABSTRACT OF THE DISCLOSURE**

2

3                   A clip to interconnect primary and secondary  
4 bone zones having edges and surfaces, comprising in  
5 combination a first tab to extend proximate a surface  
6 of the secondary bone zone; a second tab associated  
7 with the first tab, and located to extend proximate a  
8 surface of the primary bone zone, the second tab having  
9 at least one barb oriented to engage the primary bone  
10 to resist displacement of the second tab in a  
11 longitudinal direction toward the secondary bone zone.
